For Immediate Release – June 30, 2008

## **New Trier facilities options to be presented**

Options for the future of the New Trier facilities will be presented at a Special Meeting of the Board of Education at 6:00 p.m., July 7, in Room 234, Building C, at the Northfield Campus. The public is invited to attend.

The presentation will summarize the work of the Facilities Workshop Committee. This 60-member group -- comprised of community, staff and students -- met monthly from March through early June to examine facilities issues at the Winnetka and Northfield campuses in light of educational needs now and in the future. Architects from the firm Perkins + Will, who facilitated the Workshop Committee meetings, also will attend.

The presentation will outline the "pros" and "cons" of each of the facilities options -- ranging from selected renovation at both campuses to significant demolition and reconstruction. Long range plans for both the Northfield and Winnetka campuses also will be discussed.

The Board of Education will continue to study the options this summer and fall, and will establish a timeline regarding facilities planning.

Many community members have chosen to attend the informational meetings and Winnetka Campus tours that the District has hosted throughout the spring.

Additional tour and meeting dates will be scheduled this summer and fall. At these meetings, Superintendent Linda Yonke will describe the facilities planning process and potential construction project, and will answer residents' questions related to the facilities study.

Following each meeting, community members may view campus strengths and facilities challenges during a walking tour of the building, led by John Neiweem, Director of Physical Plant Services.

Please check the New Trier Facilities Planning web page ([www.newtrier.k12.il.us/facilities](http://www.newtrier.k12.il.us/facilities)) and local media for these upcoming tour dates.
